Professional Summary

Detail-oriented Software Tester with hands-on experience in Manual and Automation Testing. Skilled in analyzing requirements, designing and executing test cases, and identifying software defects. Worked on automation testing using Selenium WebDriver with Python for regression and functional scenarios. Adept at working in Agile environments with tools like Azure DevOps and Postman, and currently engaged in independent QA projects to stay technically active and up to date with the latest tools and practices.

Education

Shivaji University, Kolhapur - Bachelor in Computer Science
Satara, Maharashtra | July 2021 – May 2024

KBP University, Satara - Master of Vocation in Information Technology (Pursuing – 2nd Year)
Satara, Maharashtra | July 2025 – Present

Technical Skills

Languages: SQL, HTML, CSS, JavaScript, Python
Testing Skills: Manual Testing (Functional, Regression, Smoke, Sanity), Automation Testing (Selenium WebDriver with Python), Test Case Design & Execution, Bug Reporting, SDLC & STLC Understanding
Backend Technologies: ASP.NET, PHP, C#
Databases & Frameworks: MySQL, Microsoft SQL Server, Oracle (Basics), Entity Framework (ASP.NET)
Tools & Platforms: Azure DevOps, Postman (API Testing), AnyDesk (Remote Support), MS Excel, MS Word, PowerPoint, Visual Studio Code

Experience

Freelance / Independent QA Projects (Remote)
May 2025 – Present

- Working on manual and automation testing of demo and live web applications.
- Creating and executing Selenium WebDriver test scripts using Python.
- Performing API testing with Postman and database validation with SQL.
- Designing test cases, documenting defects, and improving test efficiency through automation.
- Staying updated with the latest QA tools, frameworks, and testing practices.

Software Tester — ACPL, Satara
July 2024 – Present | Full-time Role

- Performing manual and automation testing of web-based applications.
- Designing & executing detailed test cases; documenting defects in Azure DevOps.
- Developing Selenium WebDriver scripts (Python) for regression & functional testing.
- Backend validation using SQL and database checks.
- Providing technical support via AnyDesk and resolving client-side issues.
- Participating in Agile meetings including stand-ups and sprint planning.

Software Testing Intern — ECS, Satara
April 2024 – June 2024 | Internship (3 Months)

- Worked on manual testing and created test cases for web applications.
- Learned and applied automation testing concepts using Selenium WebDriver with Python.
- Supported the QA team in test execution and bug reporting.
- Understood the SDLC/STLC process and documentation standards.

Projects

HRMS Software Testing
- Conducted end-to-end manual and automation testing of HRMS modules (Employee, Attendance, Leave, Salary).
- Created and executed Selenium scripts for repetitive regression cases.
- Used SQL for database validation and Azure DevOps for bug tracking.

LCL Software (Partial Module Testing)
- Tested modules like Package Tracking, Order Status, and Delivery Scheduling.
- Verified workflows using positive and negative test scenarios.
- Logged issues and provided suggestions for UI and functionality improvements.
- Supported client-side remote testing using AnyDesk.

Extracurricular

- Regularly practice automation testing with Selenium and Python through YouTube and online tutorials.
- Explore new tools and frameworks related to QA and testing.
- Collaborate with peers on academic and project testing activities.
- Enthusiastic learner with a focus on continuous technical improvement.
